

Miniature Solid State Recorder with Removable CompactFlash Memory

Features

- Solid state PCM/recorder
- Two versions available
 - Stand alone with internal power supply
 - MCDAU/MEDAU stackable utilizing the system power supply
- Ruggedized for airborne applications
- Uses up to 2 CompactFlash cards
 - 64 GB capacity when configured with two 32 GB CompactFlash memory cards installed in the available media slots
 - Removable data transfer
- Acquires one PCM input channel
 - Data rates up to 10 Mbps
 - Internal frame correlator
- Uses digital recording format
 - Standard file structure
 - Microsecond frame time tag
 - Simplifies direct analysis from media
 - PCM regeneration not required
- Flexible control/status interfaces
 - RS-232 (setup/control/status)
 - Discrete (control/status)
- Compatible with MUX-300x products

Description

The MSSR solid state PCM recorder is used in demanding applications such as airborne instrumentation recording. Two versions are available the MSSR-100C, a stackable version that works with TTC's MCDAU and MEDAU encoders, and the MSSR-2000C-SA a stand alone version that includes an internal power supply. The unit is configured to handle one high speed serial PCM input at data rates up to 10 Mbps. A frame correlator decommutates the PCM data for direct file-structure recording. Plug-in CompactFlash cards are available with capacities up to 32 GB. With two of these devices installed the recorder's total capacity is 64 GB. The unit is programmable via serial RS-232. Control/Status is also provided. Acquired data can be analyzed/archived on a standard PC.

Applications

- Flight test instrumentation
- Limited space applications
- Portable recording systems
- Applications requiring playback/analysis on a standard laptop computer
