

12 Channel Bridge Completion Module

Features

- 12-channels per Module
- 1 to 3 Arm Bridge Completion
- Passive module
- Bifurcated terminals provided for resistor installation.
- Ratio Matched resistor network provided for 1/2 bridge completion

Description

The MBRC-112A is a 12-channel plug-in bridge completion module for use in TTC's MEDAU-2000 and MCDAU-2000 products. It is intended to be used with our full bridge signal conditioning modules (such as the MSCD-104P) to provide 1 to 3 arm bridge completion.

Applications

- 1 to 3 Arm Bridge Completion
