

Miniature Power Supply Module Set

Features

- Miniature Power Supply Module Set
- Up to 30 Watts output power per MPSM module
- Allows smaller stack size
- Mix and match power supplies to suit system power needs

Description

The MPFM-461/MPSM-2XXX module set is used in applications that require up to 90 Watts of power. The MPSM-2XXX module contains the power supply and the MPFM-461 module provides EMI filtering. Different modules are available to satisfy a wide range of system power needs.

Applications

- Limited Installation Room
- Improved Accessibility
