

## MEDAU/MCDAU/MWDAU 200 Watt Power Supply

### Features

- Main System Power Supply
- Up to 200 Watts power output
- Inhibit function
  - “Stands Down” power supply
- Battery Backup

### Description

The MPSM-2000A is the main power supply for TTC’s MEDAU/MCDAU/MWDAU-2000 products. It takes the aircrafts raw +28VDC power, filters it and converts it to the various voltages required for system operation. It can provide up to 200 Watts of power. There is also an “Inhibit” function that can be used to “Stand Down” the unit without removing the +28VDC power. Additionally, there is an external battery input that provides a “Keep Alive” function for certain internal circuits such as time code.

### Applications

- MEDAU/MCDAU/MWDAU system power

Revision 02/23/2009
