

## 15 Watt Power Supply Module

### Features

- Main System Power Supply
- +28VDC Input
- +5VDC Output
- Up to 15 Watt Output Power

### Description

The MPSM-2305 power supply can be used on MEDAU/MCDAU stacks requiring power at +5VDC only. The unit will supply up to 15 Watts at +5VDC (3 Amps). It takes raw +28VDC aircraft power, filters it and converts it to +5VDC.

### Applications

- MEDAU/MCDAU System Power

Revision 02/24/2009
