

Voltage Excitation Module

Applications

- Bridge Excitation

Features

- Constant Voltage Excitation
- $\pm 0.15\%$ of Full Scale accuracy
- Four individual excitation sources
 - Short circuit protection per source
- Remote Sense Capability
 - 1 wire Remote Sense
 - 2 wire Remote Sense
- MVEX-104S
 - Output of 10 VDC
 - Up to 250 mA per source
- Multiple MVEX-104S's in a Single Unit
- Windows 95/98/NT/2000 Software Included

Description

The MVEX-104S module provides constant excitation to external bridges. The module contains four individual voltage sources and has four contact pairs (EXOUT and EXRTN) per source for wiring convenience. The MVEX-104S provides a fixed 10 VDC output at up to 250 mA current output per source.
